

Contents

Preface

Chapter 1

Autoantibodies and other Biomarkers in Precision Medicine

1	Kaleidoscope of autoimmunity – an update <i>Justyna Roszkiewicz, Yehuda Shoenfeld</i>	3
2	Understanding and Addressing Gaps in Autoantibody Testing: Pragmatic Approaches to Precision Health <i>Marvin J. Fritzler</i>	8
3	Autoantibodies in the management of individual patients with connective tissue disease - a Rheumatologist's perspective <i>Martin Aringer</i>	15
4	GUT-joint axis: are rheumatologic processes initiated by enteric events? <i>Aaron Lerner, Patricia Wusterhausen, Sandra Neidhöfer, Torsten Matthias</i>	16
5	Anti-DFS autoantibodies as probes to characterize the DFS70/LEDGFp75 interactome <i>Greisha L. Ortiz-Hernandez, Evelyn Sanchez-Hernandez, Shannalee R. Martinez, Michael Mahler, Carlos A. Casiano</i>	18
6	Serum antibody profiling reveals a stratification of healthy toddlers into low, intermediate and high IgG responders towards autoantigens, infectious agents, and vaccine antigens <i>Quan-Zhen Li, Mei Yan, Patricia Pichilingue-Reto, Prithvi Raj, Igor Dozmorov, Edward K. Wakeland, Nicolai S.C. van Oers</i>	20
7	Splice site mutation of FOXP3 gene in IPEX syndrome <i>Beáta Tóth</i>	21
8	Immunomics profiling of patients with systemic autoinflammatory diseases using protein microarrays <i>Julie Krainer, Sandra Siebenhandl, Silvia Schönthaler, Sandra Nagy, Stephan Pabinger, Seza Özen, Dirk Foell, Marco Gattorno, Andreas Weinhäusel</i>	22
9	Update on the DFS70 autoantibody/autoantigen system and current challenges in understanding its clinical and biological significance <i>Greisha L. Ortiz-Hernandez, Evelyn S. Sanchez-Hernandez, and Carlos A. Casiano</i>	24
10	Novel anti-Thomsen-Friedenreich antigen-based immunoassay adds value to diagnosis and prognosis of Prostate cancer <i>Franziska Werner, Felix Hart, Jens Schmidt</i>	43
11	Protein array screening identifies biomarkers for differential and predictive diagnostics <i>Karen Münzner, Franziska Werner</i>	46

12	Identification of tumor autoantibody biomarker candidates for colon cancer by using high density peptide microarrays <i>Regina Soldo, Peter Hettegger, Andrea Stadler, Markus Degeorgi, Stefan Stiller, Walter Pulverer, Stefanie Brezina, Gernot Leeb, Andrea Gsur, Andreas Weinhäusel</i>	48
13	Identification of nine unknown nuclear antigens as autoantibody targets in systemic autoimmune diseases <i>Zitao Zeng, Ramona Miske, Madeleine Scharf, Yvonne Denno, Christian Probst, Winfried Stöcker, Lars Komorowski</i>	50
14	Autoantibodies in lung cancer patients treated with immune checkpoint inhibitors <i>Takanobu Jotatsu, Keishi Oda, Kazuhiro Yatera, Tomoko Hasegawa, Shin Tanaka, and Minoru Satoh</i>	52

Chapter 2

Precision Medicine in the Care of Rheumatoid Arthritis and Ankylosing Spondylitis

15	Prevention of Rheumatoid Arthritis by early identification enabled through autoantibodies <i>Kevin Deane</i>	63
16	Association of autoantibody profiles in Rheumatoid Arthritis with clinical phenotypes and outcome <i>Rene E. M. Toes</i>	64
17	Novel strategies for improving serodiagnostics of rheumatoid arthritis <i>Daniela Sieghart, Paul Studenic, Günter Steiner</i>	65
18	Addressing the diagnostic gap in rheumatoid arthritis by complementing the serology with genetic information <i>Isabel Gehring, Daniela Sieghart, Leonid Padyukov, Yutao Fu, Sascha Swiniarski, Josef Smolen, Maryam Poorafshar, Günter Steiner, Lars Klareskog</i>	71
19	Glycosylation of antibodies in autoimmune diseases - Special focus on Fab glycans <i>Rene E. M. Toes</i>	74
20	Value of anti-PAD autoantibodies for identifying informative clinical subsets in rheumatoid arthritis <i>Erika Darrah</i>	75
21	Antibodies to protein-arginine deiminases as tools for diagnosis and patient stratification in rheumatoid arthritis <i>Laura Martinez-Prat, Victor Martinez-Taboada, Barbara Tolusso, Elisa Gremese, Marcos Lopez-Hoyos, Michael Mahler</i>	78
22	Anti-PAD4 antibodies can help close the seronegative gap in Rheumatoid Arthritis <i>Laura Martinez-Prat, Barbara Tolusso, Chelsea Bentow, Anna Laura Fedele, Clara Di Mario, Elisa Gremese, Michael Mahler</i>	86
23	The role of RA33 isotypes in early rheumatoid arthritis diagnostics <i>Maresa Grundhuber, Daniela Sieghart, Günter Steiner, Josef Smolen, Thomas Bergman, Johan Askling, Maryam Poorafshar, Sascha Swiniarski</i>	89

24	The importance of isotypes of RF and anti-CCP for rheumatoid arthritis diagnostics <i>Daniela Sieghart, Alexander Platzter, Paul Studenic, Farideh Alasti, Maresa Grundhuber, Helmuth Haslacher, Günter Steiner</i>	91
25	Diagnostic performance of anti-cyclic citrullinated peptide (CCP) 2 and CCP3.1 assays in early rheumatoid arthritis <i>Daniela Sieghart, Christian Konrad, Sascha Swiniarski, Helmuth Haslacher, Daniel Aletaha, Günter Steiner</i>	94
26	Diagnostic test accuracy of anti-CCP tests depending on the duration of the disease, study design, antigen type and commercial test used: A critical appraisal and comparison of meta-analysis published <i>Carmen Andalucia, Dragan Urošević, Sigrid Sjölander, Maryam Poorafshar</i>	96
27	Presence of anticitrullinated protein antibodies in a large population-based cohort from the Netherlands <i>Annemirthe van Zanten, Suzanne Arends, Caroline Roozendaal, Pieter C. Limburg, Fiona Maas, Leendert A. Trouw, René E.M. Toes, Tom W.J. Huizinga, Hendrika Bootsma, Elisabeth Brouwer</i> <i>Will be presented on behalf of the authors by Annechien J.A. Lambeck</i>	99
28	Autoantibodies as predictors of response to therapy in rheumatoid arthritis patients <i>Daniela Sieghart, Alexander Platzter, Farideh Alasti, Paul Studenic, Maresa Grundhuber, Sascha Swiniarski, Stephan Blüml, Helmuth Haslacher, Josef Smolen, Günter Steiner</i>	101
29	Seroreversion of autoantibodies to UH-RA.21 peptide is associated with CDAI remission in rheumatoid arthritis patients of the CareRA cohort <i>Patrick Vandormael, Silke Loyens, Pieter Ruytinx, Liesbeth De Winter, Veerle Stouten, Piet Geusens, Patrick Verschueren, Veerle Somers</i>	102
30	<i>Porphyromonas Gingivalis</i> Peptidylarginine Deiminase from RA patient citrullinates major RA-autoantigens biomarkers for Interstitial Lung Disease Arthritis <i>Madeleine Jennings, Bianka Marklein, Anders Jimmy Ytterberg, Roman A. Zubarev, Karen Münzner, Dirkjan van Schaardenburg, Lotte A. van de Stadt, Gerd-Rüdiger Burmester, Karl Skriner</i>	104
31	Lamin A and isoform 2 of desmoplakin as novel targets of antibodies against the UH-RA.21 peptide <i>Silke Loyens, Pieter Ruytinx, Liesbeth De Winter, Piet Geusens, Jean-Paul Noben, Patrick Vandormael, Veerle Somers</i>	106
32	Immunogenicity of TNF α inhibitors: a cross-sectional and a prospective real-life experience in rheumatoid arthritis patients <i>Pier Luigi Meroni, Caterina Bodio, Claudia Grossi, Andrea Becciolini, Antonio Marchesoni, Matteo Filippini, Paola Migliorini, Roberto Caporali, Raffaele Pellerito, Francesco Ciccia, Piercarlo Sarzi-Puttini, Federico Perosa, Giuseppe Paolazzi, Ivana Hollan, Francesca Pregnotato, Maria Orietta Borghi</i>	108

33	Polymorphisms in <i>ikzf1</i> gene predict the non response to tumor necrosis factor α -blocking agents in Rheumatoid Arthritis patients	111
	<i>Pier Luigi Meroni, Caterina Bodio, Claudia Grossi, Daniela Privitera, Elena Raschi, Andrea Becciolini, Antonio Marchesoni, Matteo Filippini, Carlo Selmi, Roberto Caporali, Raffaele Pellerito, Francesco Ciccia, Piercarlo Sarzi-Puttini, Francesca Pregnolato, Maria Orietta Borghi</i>	
34	Serum calprotectin in the diagnostic work-up of Rheumatoid Arthritis	113
	<i>Lieve Van Hoovels, Bert Vander Cruyssen, Laura Bogaert, Stefanie Van Den Brems, Xavier Bossuyt</i>	
35	The frequency of occurrence and the most common patterns of antinuclear antibodies in patients with rheumatoid arthritis and ankylosing spondylitis during Infliximab treatment	115
	<i>Marharyta V. Volkava, Alena V. Kundzer, Dirk Roggenbuck, Mandy Sowa</i>	
36	Immunoglobulin G autoantibodies to three novel peptides in early axial spondyloarthritis in two independent cohorts	117
	<i>Dana Quaden, Patrick Vandormael, Pieter Ruytinx, Piet Geusens, Johan Vanhoof, Frank Vandenabeele, Kurt de Vlam, Veerle Somers</i>	
37	Screening for immunoglobulin A antibody reactivity in early axial spondyloarthritis identifies novel antigenic targets	119
	<i>Dana Quaden, Janriama Sirait, Patrick Vandormael, Pieter Ruytinx, Kristoff Corten, Johan Vanhoof, Piet Geusens, Veerle Somers</i>	

Chapter 3

Precision Medicine in the Care of Systemic Sclerosis

38	The clinical spectrum of systemic sclerosis	123
	<i>Carlo Chizzolini</i>	
39	Antinuclear antibodies in Systemic Sclerosis: an overview	135
	<i>Carolien Bonroy, Karin Melsens, Vanessa Smith</i>	
40	Autoantibody profile in a cohort of Systemic Sclerosis patients from a single centre: clinical and serological associations	151
	<i>Micaela Fredi, Ilaria Cavazzana, Marzia Garofalo, Nice Carabellese, Fabio Ferrari, Paolo Airò, Angela Tincani, Franco Franceschini</i>	
41	Evaluation and verification of autoantibody profiles in systemic sclerosis	153
	<i>Ruben L. Smeets, Renate van der Molen, Brigit Kersten, Hans Koenen, Wynand Alkema, Charlotte Kaffa, Frank van den Hoogen, Irma Joosten, Madelon Vonk</i>	
42	A bioinformatic analysis supports a role of human cytomegalovirus as a trigger of Systemic Sclerosis-specific autoantibodies	156
	<i>Athanasios Gkoutzourelas, M. Barmakoudi, Dimitrios P. Bogdanos</i>	
43	Elevated kynurenine levels in diffuse cutaneous and anti-RNA polymerase III positive systemic sclerosis	158
	<i>Corrado Campochiaro, Simon D. Lytton, Svetlana Nihtyanova, Dietmar Fuchs, Voon H. Ong, Cristopher P. Denton</i>	

44	Clinical associations of anti-U11/U12 (RNPC-3) autoantibodies in patients with systemic sclerosis	159
	<i>Carmen Pilar Simeón, Mary Ann Aure, Fabreze Roup, Chelsea Bentow, Janire Perurena, Maite Sanz, Alfredo Guillen, Ana Marín, Vicent Fonollosa, Eduardo Callejas, Michael Mahler</i>	
45	Comparison of immunodominant epitope recombinant RNPC-3 and RNPC-3 peptide as a target of autoantibodies in patients with systemic sclerosis	161
	<i>Michael Mahler, Chelsea Bentow, Fabreze Roup, Haiyan Hou, May Y. Choi, Marvin J. Fritzler</i>	
46	Primary biliary cholangitis-related serology in systemic sclerosis patients: a three-years follow up study	163
	<i>Lisa Florin, Kaat Rubben, Amber Vanhaecke, Katrien Devreese, Filip De Keyser, Vanessa Smith, Carolien Bonroy</i>	

Chapter 4

Precision Medicine in the Care of Idiopathic Inflammatory Myopathies

47	A new approach for classification of autoimmune myositis	167
	<i>Yves Allenbach</i>	
48	Anti-cN-1A (NT5C1A) autoantibodies in autoimmune and infectious diseases	169
	<i>Ger J.M. Pruijn and Eline A. Visser</i>	
49	Autoantibodies in myositis measured using a novel particle based multi-analyte technology	182
	<i>Michael Mahler</i>	
50	Autoantibody's profile and clinical correlations in a cohort of IIM from a single center	185
	<i>Micaela Fredi, Ilaria Cavazzana, Micol Frassi, Paolo Airò, Angela Ceribelli, Nice Carabellese, Marco Taglietti, Minoru Satoh, Angela Tincani, Franco Franceschini</i>	
51	Subcutaneous calcinosis in autoimmune inflammatory myopathies: update on autoantibodies as biomarkers	187
	<i>Carlos A. von Mühlen</i>	
52	Anti-NXP2 antibodies: clinical and serological associations in a multicentric Italian study	192
	<i>Micaela Fredi, Ilaria Cavazzana, Angela Ceribelli, Simone Barsotti, Maurozio Benucci, Lorenzo Cavagna, Ludovico De Stefano, Andrea Doria, Marco Fornaro, Federica Furini, Roberto Gerli, Mariagrazia Giudizi, Marcello Govoni, Anna Ghirardello, Luca Iaccarino, Fiorenzo Iannone, Maria Infantino, Alessandro Mathieu, Emiliano Marasco, Paola Migliorini, Boaz Palterer, Matteo Piga, Federico Pratesi, Antonella Radice, Valeria Ricceri, Carlo Selmi, Marilina Tampoia, Alessandra Tripoli, Giovanni Zanframundo, Angela Tincani, Franco Franceschini, on behalf of Forum Italiano per la Ricerca Malattie Autoimmuni (FIRMA)</i>	

53	Prevalence of anti-C5'N1A autoantibodies in a French cohort of patients with Inclusion Body Myositis	194
	<i>David Goncalves, Thierry Vincent, Laure Gallay, Nathalie Streichenberger, Raul Juntas-Morales, Sylvain Dubucquoi, Daniela Lakomy, Catherine Johanet, Françoise Fortenfant, René-Louis Humbel, Xavier Bossuyt, Pascale Chretien, Benoit Nespola, Sophie Hue, Frédéric Coutant, Nicole Fabien</i>	
54	Addition of cN-1A as a target for detection of autoantibodies associated with Inclusion Body Myositis to a multiparameter lineblot immunoassay for autoimmune inflammatory myopathies	196
	<i>Julia Janz, Anthonina Ott, Thomas Scheper, Wolfgang Schlumberger, Wolfgang Meyer</i>	
55	Profiling autoantibodies in Idiopathic Inflammatory Myopathies, Systemic Sclerosis and Systemic Lupus Erythematosus	198
	<i>Quan-Zhen Li, Mei Yan, Chengsong Zhu, Li Wang, Indu Raman, Edward Wakeland, Xiaoxia Zuo</i>	
56	Reactivity profile of novel human monoclonal antibodies to SAE, TIF1 γ , MDA5 and NXP2	200
	<i>Michaelin Richards, Andrea Seaman, Charles Warren, Adrian Saclolo, Carolina Auza, Kishore Malyavantham, Michael Mahler</i>	
57	Prevalence of anti-Ku antibodies in various connective tissue diseases measured by a novel particle based multi-analyte technology	202
	<i>Andrea Seaman, Marychel Tiongson, Charles Warren, Gabriella Morozzi, Maria Grazia Bacarelli, Danilo Villalta, Maria Orietta Borghi, Pier Luigi Meroni, Albert Selva O'Callaghan, Michael Mahler</i>	

Chapter 5

Precision Medicine in the Care of Antiphospholipid Syndrome and Systemic Vasculitides

58	Antiphospholipid antibodies in clinical practice	207
	<i>Cecilia Nalli</i>	
59	Profiling of criteria and non-criteria antiphospholipid antibodies in Russian patients with SLE	208
	<i>Olga Tkachenko, Sergey Lapin, Elizaveta Belolipetskaia, Irina Beliaeva, Valentina Myachikova, Alexey Maslyansky, Dirk Roggenbuck</i>	
60	Testing of anti-phosphatidylserine/prothrombin antibodies - Added value for APS diagnostics?	210
	<i>Veronika Mikulová, Irena Francová, Helena Posová, Tomáš Zima</i>	
61	Clinical performance of a novel Multi-Analyte Assay for the diagnosis of APS in a Spanish cohort	212
	<i>Estibaliz Ruiz-Ortiz, Natalia Egri, Laura Rubio, Albert Pérez-Isidro, Andrea Seaman, Carlos Ramírez, Douglas Mackey, Ricard Cervera, Gerard Espinosa, Odette Viñas, Michael Mahler</i>	

62	Vasculitis biomarkers in the era of the personalized medicine <i>Elena Csernok</i>	214
----	---	-----

Chapter 6

Precision Medicine in the Care of Organ Specific Autoimmune Diseases

63	Update on IgG4-mediated autoimmune diseases <i>Inga Koneczny</i>	221
64	Microbial transglutaminase is a potential driver of autoimmunity <i>Ajay Ramesh, Aaron Lerner, Sandra Neidhöfer, Patricia Wusterhausen, Torsten Matthias</i>	248
65	Probiotics: If it does not help it does not do any harm in celiac disease. Really? <i>Aaron Lerner, Yehuda Shoenfeld, Torsten Matthias</i>	250
66	Autoantibody profiling in Celiac Disease: The value beyond IgA anti-tTG <i>Xavier Bossuyt</i>	251
67	CHI3L1 in IBD - A potential association with ASCA <i>Claudia Deutschmann, Dirk Roggenbuck, Peter Schierack</i>	252
68	A location based prediction model in Crohn's disease regarding a novel serological marker, Chitinase 3-like 1 autoantibodies <i>Nora Sipeki, Patricia Kovats, Claudia Deutschmann, Peter Schierack, Dirk Roggenbuck, Maria Papp</i>	253
69	Anti-GP2 autoantibodies are biomarkers of disease severity and prognosis in patients with primary sclerosing cholangitis (PSC) <i>Ewa Wunsch, Malgorzata Milkiewicz, Marcin Krawczyk, Marta Slimak-Mastrobuoni, Zakera Shums, Mary Ann Aure, Chelsea Bentow, Gary L. Norman, Dirk Roggenbuck, Piotr Milkiewicz</i>	255
70	The significance of antibodies against Glycoprotein 2 in Chinese inflammatory bowel disease patients <i>Shulan Zhang</i>	257
71	Monitoring of drug level and anti-drug antibody production during vedolizumab therapy in patients with inflammatory bowel disease <i>Gábor Nagy, Éva Török, Károly Palatka, Zsófia. Kébel, Péter Antal-Szalmás</i>	259
72	Pre-analytical evaluation of circulating calprotectin in serum and citrate plasma from healthy donors <i>Jenna Memmolo, Roger Albesa, Emily FitzGerald, Maria Infantino, Mariangela Manfredi, Valentina Grossi, Maurizio Benucci, Francesca Li Gobbi, Alessandra Matucci, Filippo Sarra, Michael Mahler</i>	260
73	Gastric parietal cell and intrinsic factor autoantibodies in children and young adults with type 1 diabetes <i>Raivo Uibo, Aleksandr Peet, Kaire Heilman, Kaja Metsküla</i>	262

- 74 Autoantibodies associated with Bronchiolitis Obliterans of chronic allograft dysfunction in lung transplantation 263
Quan-Zhen Li, Chengsong Zhu, Mei Yan, Leying Feng, Lance Terada, Vaidehi Kaza
- 75 The impact of prophylactic treatment of recombinant banana lectin on the innate immune response in TNBS induced colitis in C57BL/6 mice 265
Radmila Miljković, Emilija Marinković, Ana Filipović, Ivana Lukić, Mina Popović, Zorana Lopandić, Marija Gavrović-Jankulović, Marijana Stojanović
- 76 Evaluation of maternal infertility related autoantibody test results in a three-year period 267
Zsuzsanna Csizmadia, Katalin Böröcz, Vivien Varga, Noémi Balázs, Timea Berki

Chapter 7

Precision Medicine in the Care of Heart Diseases

- 77 Autoimmune Cardiac Channelopathies 271
Mohamed Boutjdir
- 78 Prognostic significance of low anti-beta1 adrenergic receptor antibody concentrations in acute coronary syndrome 273
Diana Ernst, Johan Westerbergh, Georgios Sogkas, Alexandra Jablonka, Gerrit Ahrenstorf, Reinhold Ernst Schmidt, Harald Heidecke, Lars Wallentin, Torsten Witte, Gabriela Riemekasten
- 79 Chronic fatigue syndrome, postural orthostatic tachycardia and human papillomavirus vaccine: the common denominator - anti-neurotransmitter receptor autoantibodies 275
Varvara A. Ryabkova, Darja Kanduc, Leonid P. Churilov, Yehuda Shoenfeld
- 80 BC 007 neutralizes functional autoantibodies against G protein-coupled receptors: Results of the Phase 1 clinical trial proof successful mode of action 281
Niels-Peter Becker, Johannes Müller, Annekathrin Haberland, Gerd Wallukat, Katrin Wenzel, Peter Göttel, Sarah Schulze-Rothe, Ingolf Schimke, Tuba Yilmaz, Ayse Abay, Anne Wallukat, Anne-Sophie Hönicke, Susanne Becker

Chapter 8

Precision Medicine in the Care of Neurologic Autoimmune Diseases

- 81 Holistic characterization of the repertoire of targeted autoantigens of Chronic Inflammatory Demyelinating Polyneuropathy (CIDP) 285
Christian P. Moritz, Oda Stoevesandt, Yannick Tholance, Carole Rosier, Karine Ferraud, Jean-Philippe Camdessanché, Jean-Christophe Antoine
- 82 Neurochondrin neurological autoimmunity 286
Shahar Shelly, Thomas J. Kryzer, Vanda A. Lennon, Lars Komorowski, Ramona Miske, Winfried Stöcker, Mark D. Anderson, Shannon R. Hinson, Sean J. Pittock, Andrew McKeon

83	Incidence of antibodies against the node of Ranvier in a prospective cohort of 1000 CIDP <i>José Boucraut, Émilien Delmont, Alexandre Brodovitch, Shahram Attarian and the French CIDP group.</i>	288
84	Value of anti-HNK1 antibodies in anti-MAG neuropathies: an analysis of 144 sera <i>José Boucraut, Alexandre Brodovitch, Jean Claude Antoine, Stéphane Paul, Shahram Attarian, Émilien Delmont</i>	289
85	The importance of second level confirmatory IHC assay to confirm autoantibody CSF expression in a case of Morvan syndrome <i>Martina Fabris, Greta Macorig, Romina Milanic, Laura Cecotti, Maria Rachele Bianchi, Piera De Gaspari, Francesco Curcio, Michele Rana</i>	291
86	Identification of DAGLA as an autoantibody target in cerebellar or hippocampal degeneration <i>Ramona Miske, Madeleine Scharf, Stefanie Hahn, Yvonne Denno, Farid Benkhadra, Nadine Rochow, Christian Probst, Bianca Teegen, Winfried Stöcker, Lars Komorowski</i>	293
87	Identification of RGS8 as an autoantibody target in paraneoplastic cerebellar syndrome <i>Ramona Miske, Madeleine Scharf, Christian Borchers, Yvonne Denno, Bianca Teegen, Nadine Rochow, Christian Probst, Winfried Stöcker, Pawel Kermer, Lars Komorowski</i>	295
88	Epitope mapping for anti-FGFR3 autoantibodies in Sensory Neuropathy <i>Christian P. Moritz, Lauriane Mohr, Yannick Tholance, Martin Jung, Evelyne Reynaud-Federspiel, Karine Ferraud, Jean-Philippe Camdessanché, Jean-Christophe Antoine</i>	297
89	Autoimmune gait disturbance accompanying adaptor protein-3B2-IgG <i>Josephe A. Honorat, A. Sebastian Lopez-Chiriboga, Thomas J. Kryzer, Vanda A. Lennon, Lars Komorowski, Madeleine Scharf, Winfried Stöcker, Shannon R. Hinson, Sean J. Pittock, Christopher J. Klein, Andrew McKeon</i>	299
90	Identification of novel maternal autoantibodies for autism spectrum disorder using cDNA phage display <i>Rut Mazón-Cabrera, Patrick Vandormael and Veerle Somers</i>	301

Chapter 9

Methodical Aspects of Autoantibody Detection

91	Standardisation and harmonisation of quantitative autoantibody testing <i>Joanna Sheldon</i>	305
92	Establishment of international autoantibody reference standards for the detection of anti-NuMA, anti-multiple nuclear dots, and anti-GW body autoantibodies <i>Bing Zheng, Rodrigo A. Mora, Marvin J. Fritzler, Minoru Satoh, Ignacio Garcia-De La Torre, Katherine Boylan, Kathryn Kohl, Luis E.C. Andrade, Edward K.L. Chan</i>	313
93	Development and clinical use of a technique to quantify autoantibodies in immune complexes <i>Johan Rönnelid and Azita Sohrabian</i>	315

- 94 Simultaneous detection and quantification of DNA- and protein biomarkers in a microfluidic microbead chip 320
Stefan Rödiger, Franziska Dinter, Michał Burdukiewicz, Peter Schierack, Werner Lehmann, Joerg Nestler, Gregory Dame
- 95 Single testing vs. double testing strategy in the screening of connective tissue disease: A comparison of clinical performance and reimbursement in Germany 322
Carmen Andalucia, Martin Brandenburg and Sigrid Sjölander
- 96 Comparison of commonly used dsDNA assay types in order to better support an accurate clinical diagnosis 325
Katalin Böröcz, Zsuzsanna Csizmadia, Vivien Varga, Timea Berki
- 97 Clinical comparison of Aptiva with QUANTA Flash for the detection of anti-dsDNA autoantibodies 327
Charles Warren, Andrea Seaman, Michelle Anne Amio, Chelsea Bentow, Gabriella Morozzi, Maria Grazia Bacarelli, Danilo Villalta, John Hanly, Michael Mahler
- 98 What's behind the pattern? A new method to detect anti-DFS70 autoantibodies 329
Jean-Luc Charuel, Hanna Berkner, Pascale Ghillani-Dalbin, Makoto Miyara and Lucile Musset
- 99 A novel indirect immunofluorescent method for anti-DFS70 antibodies 331
Pelin Onarer, Esvet Mutlu, Gözde Öngüt, Meral Gültekin
- 100 Prospective validation of a novel DFS70 immunoassay in samples with suspected ANA-associated autoimmune rheumatic diseases 333
Olaf Nickel, Stephan Borte, Andreas Pöge, Michael Borte, Martin Brandenburg, Raik Wolf, Johannes Wolf
- 101 EliA DFS70 and other routine methods for detection of anti-DFS70 antibodies 335
Werner Klotz, Manfred Herold
- 102 Verification of the new chemiluminescent immunoassay for DFS protein 70 antibodies (anti-DFS70) 337
Lovorka Đerek, Andrea Tešija Kuna, Milena Njegovan, Ines Vukasović
- 103 Clinical evaluation of a particle-based multi-analyte technology for the detection of anti-Th/To autoantibodies using Th/To subunits Rpp25 and Rpp38 339
Michael Mahler, Karl Norvell, Andrea Seaman, Marychel Tiongson, Charles Warren, Chelsea Bentow, Lorenzo Beretta
- 104 Evaluation of two distinct assays for detection of anti-Th/To antibodies in systemic sclerosis: a cross-sectional study 341
Janire Perurena-Prieto, Andrea Seaman, Karl Norvell, Chelsea Bentow, Eduardo Luis Callejas-Moraga, Alfredo Guillén-Del-Castillo, Laura Viñas-Gimenez, Ana Marín-Sánchez, Eva Balada-Prades, Vicent Fonollosa-Plá, Maria Sanz-Martinez, Carmen Pilar Simeón-Aznar
- 105 Anti-PL-7 is the most frequent t-RNA-synthetase antibody in routine laboratory testing 343
Michael L. Grünwald, Kai Pitterle

106 Evaluation of a novel bead based assay for the detection of HMGCR autoantibodies in Idiopathic Inflammatory Myopathies	345
<i>Michaelin Richards, Charles Warren, Andrea Seaman, Anna Ghirardello, Andrea Doria, Albert Selva O'Callaghan, Franco Fanceschini, Sophie Hue, Marvin J. Fritzler, Michael Mahler</i>	
107 Increased sensitivity for PR3-ANCA using a novel chemiluminescence immunoassay	347
<i>Elion Hoxha, Rolf A.K. Stahl, Silke R. Brix, Torsten Witte, Florian Seebeck, Wolfgang Schlumberger, Cornelia Daehnrich</i>	
108 Comparison study of four different methods for proteinase 3 and myeloperoxidase antibody detection	349
<i>Katarina Gugo, Gordana Juricic, Vedrana Drvar</i>	
109 Novel ELISA to aid the diagnosis of autoimmune gastritis	351
<i>Alexander Kühnl, Sandra Saschenbrecker, Lars Komorowski, Christian Probst, Giampaola Pesce, Wolfgang Schlumberger, Cornelia Dähnrich</i>	
110 Evaluation of a novel chemiluminescent immunoassay for the detection of anti-intrinsic factor autoantibodies	353
<i>A. Llanes, Roger Albesa, Emily Fitzgerald, Michael Mahler</i>	
111 Multiparameter assay for the detection of IgA antibodies in autoimmune gastrointestinal diseases	355
<i>Julia Janz, Anthonina Ott, Thomas Scheper, Wolfgang Schlumberger, Wolfgang Meyer</i>	
112 Multiparameter assay for the detection of IgG antibodies in autoimmune gastrointestinal diseases	357
<i>Julia Janz, Anthonina Ott, Thomas Scheper, Wolfgang Schlumberger, Wolfgang Meyer</i>	
113 Diagnostic performance of indirect immunofluorescence microscopy and enzyme-linked immunosorbent assays in bullous pemphigoid, pemphigus vulgaris and pemphigus foliaceus	359
<i>Pieter De Kesel, Sofie De Schepper, Carolien Bonroy</i>	
114 A newly developed chemiluminescence immunoassay improves the detection of anti-PLA2R autoantibodies in primary membranous nephropathy	361
<i>Alexander Kühnl, Cornelia Dähnrich, Sandra Saschenbrecker, Iva Gunnarsson, Pierre Ronco, Hanna Debiec, Wolfgang Schlumberger</i>	
115 Development of the first 1-step radioactive immunoassay for the detection of TRAb	363
<i>Johannes Roggenbuck</i>	
116 Evaluation and comparison of the analytical performance of autoimmune antibodies on the HOB BioCLIA® 1200 Automated Immunoassay Analyzer to the Phadia 250® System	364
<i>Christine Knies, Michael Olivo, Ralf Tönnies, Philipp von Landenberg</i>	
117 Evaluation and comparison of the analytical performance of autoimmune antibodies on the HOB BioCLIA® 6500 automated immunoassay analyzer to the Phadia 250® system	365
<i>Christine Knies, Michael Olivo, Ralf Tönnies, Philipp von Landenberg</i>	

Chapter 10

Update on Antinuclear Antibody (ANA) Screening and Pattern Differentiation

118	2019 - ANA detection: real life and EULAR recommendations <i>Pier Luigi Meroni, Maria Orietta Borghi</i>	369
119	The behavior of pattern and titer of HEp-2 IFA in lupus patients according to disease activity status <i>Mônica Simon Prado, Alessandra Dellavance, Silvia Helena Rodrigues, Luis Eduardo Coelho Andrade</i>	372
120	A survey on methodological aspects of anti-nuclear antibody testing <i>Martine Vercammen, Sylvia Broeders, Carolien Bonroy, Wim Coucke, Laurence Lutteri, Sofie Schouwers, Lieve Van Hoovels, Xavier Bossuyt</i>	382
121	Consensus on ANA patterns (ICAP): from clinical association towards clinical relevance of HEp-2 indirect immunofluorescence patterns <i>Jan Damoiseaux</i>	384
122	A new diagnostic algorithm for pattern-oriented autoantibody testing according to the ICAP nomenclature: a pilot study <i>Maria Infantino, Teresa Carbone, Mariangela Manfredi, Valentina Grossi, Antonio Antico, Maria Piera Panozzo, Ignazio Brusca, Maria Grazia Alessio, Giulia Previtali, Stefan Platzgummer, Luigi Cinquanta, Giusy Paura, Gaia Deleonardi, Maria Teresa Trevisan, Antonella Radice, Caterina Castiglione, Tiziana Imbustaro, Martina Fabris, Giampaola Pesce, Brunetta Porcelli, Lucia Terzuoli, Maria Concetta Sorrentino, Marilina Tampoia, Danilo Villalta, Maria Elisabetta Conte, Giuseppina Barberio, Nicoletta Gallo, Maurizio Benucci, Nicola Bizzaro</i>	391
123	ICAP's recommendations to describe patterns observed on HEp-2 cells are broadly accepted in Austria <i>Manfred Herold, Werner Klotz</i>	396
124	ANA nomenclature and detection strategies (IIFT vs. collagenosis screen): experiences from proficiency testing and questionnaires (EASI) <i>Martin Blüthner</i>	398
125	AC-XX: beyond ICAP's 29 patterns <i>Manfred Herold</i>	400
126	Dissecting pleomorphic patterns: PCNA, SG2NA (AC-30) and Pseudo-PCNA patterns <i>Werner Klotz, Manfred Herold</i>	403
127	Evaluation of anti-nuclear antibody test utilization patterns in Alberta <i>Alex C. Chin, Jeannine Viczko, Jan Willem Cohen Tervaert, Anthony Russell, Robert Ferrari, Joshua E. Raizman, Barry Kyle, Ann E. Clarke, Marvin J. Fritzler, Connie Prosser</i>	407
128	ANA (HEp-2) cytoplasmic IF-patterns AC-19 and AC-20 and myositis specific antibodies results <i>Michael L. Grünwald, Irene Kolbe, Christina Kamp, Wolfgang Meyer</i>	409

129 Immunofluorescence patterns on HEp-2 cells not included in ICAP's classification tree <i>Werner Klotz, Manfred Herold</i>	411
130 Multi-center study for the association of anti-p80/coilin with anti-DFS70 in ANA positive patients <i>Michael Mahler, Chelsea Bentow, Mary Ann Aure, Fabreze Roup, Amanda Jiao, Luis E.C. Andrade, Maria Infantino, Vincent Ricchiuti, Joe Adams, May Y. Choi, Meifeng Zhang, Marvin J. Fritzler</i>	413
131 Artificial intelligence for automated pattern recognition <i>Rico Hiemann, Alexander Hiemann, Jonas Noack, Dirk Roggenbuck, Karsten Conrad, Peter Schierack</i>	415
132 Feasibility of ANA IFA harmonization: analytical evaluation of candidate standards on four commercially available automated ANA IFA analyzers <i>Lieve Van Hoovel, Edward Chan, Luis Andrade, Kai Fechner, Daria Franceschi, Kishore Malyavantham, Bernd Stoeckl, Xavier Bossuyt</i>	417
133 The clinical performance of HEp-2 IIFA on the fully automated IFx 360 System <i>Shuxia Zhou, Jeri Seiki, John Breneman</i>	420
