

Contents

Preface	4
Evaluate potential contraindications	7
Step 1: Evaluate potential contraindications	7
Prepare the patient for EIT monitoring	8
Step 2: Apply measurement tape	8
Step 3: Measure patient	9
Step 4: Determine the SensorBelt size	10
Step 5: Choose the SensorBelt	11
Step 6: Prepare the foam (ContactAgent)	12
Step 7: Apply the foam	13
Step 8: Position the SensorBelt	14
Step 9: Fit the SensorBelt (1)	15
Step 10: Fit the SensorBelt (2)	16
Step 11: Secure the SensorBelt	17
Step 12: Attach the SensorBelt (1)	18
Step 13: Attach the SensorBelt (2)	19
Step 14: Start up the SensorBelt	20
Step 15: Indicator light on SensorBelt	21
Configuration of the intensive-care ventilator elisa 800^{VIT}	22
Step 16: Activate EIT	22
Step 17: Enter patient data	23
Step 18: Minimize sources of interference	24
Step 19: Check the settings and the SensorBelt	25
Evaluate the results	26
Step 20: Evaluate regional ventilation distribution	26
Step 21: Evaluate unequal ventilation distribution between the two lungs	27
Step 22: Analyse SilentSpaces: Gravity-independent form	28

Step 23 : Analyse SilentSpaces: Gravity-dependent form	29
Step 24 : Analyse SilentSpaces: Bilateral form	30
Terminate EIT monitoring	31
Final step: Terminate EIT monitoring	31
FAQ: Practical Q&A	32
Contraindications	32
Potential complications and sources of error	32
SensorBelt	34
Interpretation	35
Core statements of the TREND group	37
Selected studies	48
Basics	48
Optimising ventilation settings	48
Display of regional lung function	49
Patient positioning	50
EIT validation	50
